

# Advocating for Canadians

**It's an important part of being a nurse**

A properly staffed and supported public health care system will provide good care for all Canadians.

Canada's nurses are committed to working toward an improved public health care system that provides the care you need, when and where you need it.

**If we are to make  
hard choices, why not  
put Canadians' top  
priorities first.**

**Health Ministers, work  
with us to improve and  
expand medicare.**
